The SeaGo Seaguard 150N work is a lightweight, close-fit lifejacket with a round neck design. This life jacket is easy to fit and simple to rearm with a low profile. Available in 3 colours and a wipe clean model for work boats.

The comfortable round neck design and its lightweight combine to make this lifejacket one of our most favoured work wear models.

The abrasion resistant cover or wipe clean cover, together with newly designed buckle, single crutch strap and lightweight d-ring makes the Seaguard an all-round lifejacket. The lifejacket comes fitted with a SOLAS approved auto-light and whistle as standard.
