

The STAR POWERHEART AED G3 & G5 Automatic Defibrillators

Two dependable members of our automated external defibrillator family - choose the one that fits your needs. The reliable, easy-to-use AED, with advanced therapy to help you save a life on-board a ship in the ocean, if a crew member has cardiac arrest every second is critical the new G5 Power heart AED Automatic is designed to help maximize responder efforts, like having medical personnel on-board.

Appropriate Locations

- Marine shipping
- Offshore supply vessels
- Offshore rigs
- Ship yards
- General practitioner's offices
- Hospitals
- Physician office

Primary Benefits

Reliability. Powerheart G3 & G5 AEDs are Rescue Ready®, meaning they self-test daily to ensure they work when you need them.

Ease of use

- Clear voice prompts guide the user through the entire process.

The difference between the G3 Powerheart and the G5 AED: the G5 has Orderable Dual Language (Primary Language/Secondary Language)

Example: English as the primary voice command with French as the secondary voice command, or vice versa.

- The device analyses the heart rhythm and 'knows' when to deliver (or not deliver) the shock.
- The text screen provides helpful information.

Powerheart AED G5

Assurance

These Powerheart G3 & G5 AEDs have a 7 year warranty and a 4 year full battery replacement guarantee. Rescue Ready® performance sets Powerheart AEDs apart technology distinguishes us among competitors.

- Every day, to ensure anytime functionality, the AED self checks all main components (battery, hardware, software and pads).
- Every week, the AED completes a partial charge of the high-voltage electronics.
- Every month, the AED charges the high-voltage electronics to full energy. If anything is amiss, the Rescue Ready status indicator on the handle changes from green to red and the device will emit an audible alert to prompt the user to service the unit.

The Powerheart AED is Rescue Ready when a life depends on it.
