

# GH SERIES

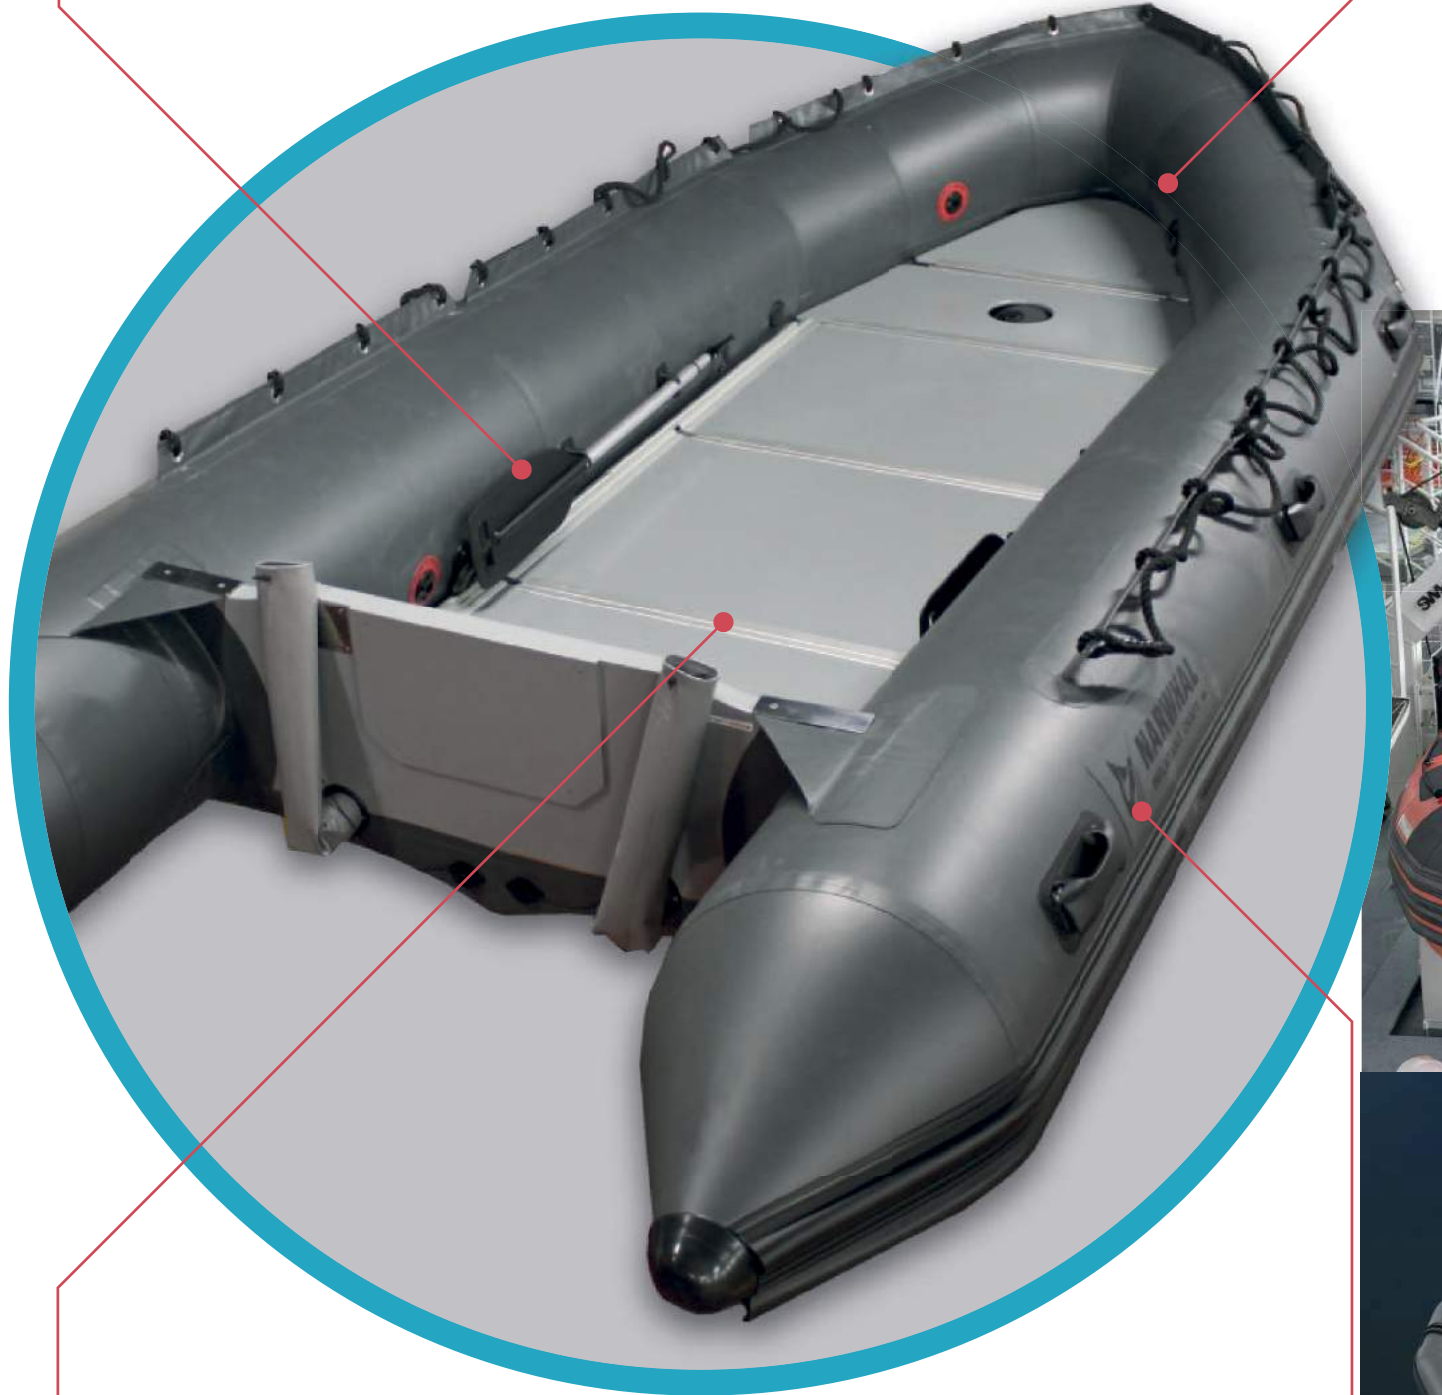

**MILITARY  
PROFESSIONAL**

**STAR  
INTERNATIONAL**

**NARWHAL<sup>®</sup>**  
INFLATABLE CRAFT **CE**

**Used in professional applications,** military operations and rescue or diving activities, auxiliary inflatable boats like our GH series are designed for easy assembly, handling and transportation.

**The wide diameter of the tubes** provides maximum safety and stability to the boat.

**Reinforced at the points of maximum effort,** they are built with a solid aluminium or marine plywood floor, which is light, resistant, non-slip and easy to maintain. Robust crossbar made of the same material.

**The finish of these boats** makes them suitable for any activity that requires a fast, efficient and safe response.

**Narwhal boats are built on three fundamental pillars: safety, resistance and quality**

The GH Series offers a full range of fully-customisable military patrol boats with the speed and agility to swiftly manoeuvre and pursue other vessels, as well as durability to withstand challenging sea conditions. These boats also offer versatility for various missions and are capable of operating effectively for extended periods.

Narwhal boats are used by sectors such as the Navy, civil protection, security, rescue and/or environmental organisations, among others. We also provide rescue products (with SOLAS and rescue approval), emergency products (fire-fighting, medicalised and flood models), offshore (military and anti-pollution), surveillance, and collapsible vessels (multipurpose and large-capacity).
